**Category I:** Weeds in this category occur at a few sites within the County, are considered an economic threat, and the landowner will cause them to be controlled annually to prevent seed production until eradication is secured.

**Category II:** Weeds in this category are mostly common in the county and will be controlled on right-of-ways and public spaces as necessary. Landowners will be assisted with cost-share funds, as available, to manage weeds on their properties with the overall goal of containment and reducing the negative impact to an acceptable level.

**Category III:** Noxious weeds **NOT** currently found growing in Pend Oreille County, but will be monitored and controlled if discovered:
